Forecast for Tuesday 24 May 2022

Weather: Some sunny spells at first, though perhaps some low cloud affecting the highest summits and ridges. Showers developing fairly widely by mid-morning, with a chance of these turning heavy and thundery for a time. Likely becoming dry by mid-afternoon along with good sunny spells. Remaining fine through the evening though cloud increasing towards midnight.

Chance of cloud-free hill tops above 600m: 60% until mid-morning then greater than 95%. Becoming 80% from late evening.

Low cloud and visibility: Visibility generally very good, but note locally frequent sharp drops in any heavy rain showers. Some broken cloud on the highest ground first thing, around 500-600m but should soon lift.

Forecast for Wednesday 25 May 2022

Weather: Cloudy overnight and turning increasingly breezy. Outbreaks of rain and drizzle arriving from the west around dawn, becoming rather persistent with extensive low cloud through until early afternoon. Sunny spells and isolated showers following, though remaining unseasonably windy. Dry by evening with partly cloudy skies.

Maximum wind: 30 mph with gusts of 40 mph on the summits during the morning.

Chance of cloud-free hill tops 600m: 80% becoming 20% overnight. Increasing to greater than 95% by early afternoon.

Low cloud and visibility: Very good initially outside of cloud but becoming good or moderate in rain and drizzle during the morning. Becoming very good again overall from early afternoon, though locally good in any showers. Patchy low cloud to 500-600m overnight should lower and become widespread around 300-400m during the morning. Cloud lifting back above summits by early afternoon though.

Temperature: **Valleys:** Plus 8 becoming Plus 17 Celsius.
At 600m: Plus 5 Celsius becoming Plus 9 Celsius.
Freezing level: Above the summits.
